## SOFT SKILLS

- Leadership
- Assertive communication
- Troubleshooting
- Ability to work independently and in a team
- Great sense of responsibility

## EDUCATION

- **CFGS**

**Development of multiplatform applications**

Barcelona Institute of Technology

2025 - 2026

- **CFGM**

**Microinformatics systems and networks**

Torre de Malla Institute

2023 - 2025

## LANGUAGES

- Catalan (native)
- Spanish (native)
- English (high)

## MOTIVATIONS

My background in network systems administration has provided me with a solid understanding of the technological environment, which I am currently expanding through the development of cross-platform applications. Although my foundation is technical, I am particularly interested in directing my career towards the field of bioinformatics, combining programming with the analysis of biological data. I am motivated by understanding how software can be applied in scientific and research contexts. I consider myself a curious person, proactive, and constantly eager to learn and improve.

## WORK EXPERIENCE

### Gymnázium a Střední odborná škola ekonomická - 2025

- Rapid integration into an international professional environment (Erasmus+ program), achieving the established objectives.
- Teamwork with professionals from the Czech Republic using English as the language of communication.
- Technical support in infrastructures and adaptation to European working methodologies.
- System verification and technical assistance to guarantee correct operation.
- High autonomy and ability to adapt in a multicultural environment.

### Torre de Malla Institute - 2024

- Incident resolution and equipment maintenance, ensuring service continuity.
- Creation of technical documentation to reduce queries and improve user autonomy.
- Installation of operating systems and management of backup copies.
- Network monitoring to minimize interruptions and ensure stability.

## TECHNICAL KNOWLEDGE

- **Software development:** Cross-platform programming and creation of web and mobile applications.
- **Databases:** Design and administration of relational and non-relational databases.
- **Operating systems:** Installation, configuration and administration of Windows and Linux environments.
- **Networks:** Configuration and maintenance of local networks (LAN), internet connection and security concepts.
- **Systems maintenance:** Hardware diagnostics and preventive and corrective maintenance.
- **Technical support and documentation:** Preparation of manuals and office support.
- **Agile methodologies:** Experience with Scrum, sprint planning and task management with Trello.
